INTRODUCTION.....

On the occasion of the 65th anniversary of the character of Franquin, I undertook the creation of a pack of special livery to his effigy. Created in 1952, was for a few years the companion of the duo Spirou and Fantasio (and also Spip not to vex him!).

The Marsupilami is a fictional animal compiling different animal characteristics such as jaguar (pelage), aquatic species (amphibian), monkeys (morphology) and many others. It is a monotreme, a rank of species possessing the characteristics of mammals and ovipares.

It was in 1987 that the series Marsupilami sees the day, with the release of the first album. Success is there and will not weaken.

This second version adds the livery to other lengths of the vehicle : Citaro K (10m), Standard (12m), Articulated (18m) and Capacity (20m). The 15m version is not included (I hate vehicles of this length).

INSTALLATION.....

Drag the specific files into the folder «MB_O530_Facelift», then «Texture» and «Repaints» The pack contains 6 versions of the vehicle:

O530_2d (Standard)

O530_3d (Standard)

O530G_3d (Articulated – G)

O530G_4d (Articulated - G)

O530GL (Capacity)

O530K (Citaro K)

For each length, there are two versions of the livery: “Album 30” and “Album 31”. The 30th (known in French as “Palombie Secrète” – “Secret Palombia”) was released in 2017 and was only available on the articulated bus with 4 doors. With the time, the livery was made for the others sizes of the Citaro. The 31st album (in FR “Monsieur Xing Yùn” – “Mr. Xing Yùn”) will be released in April 2018.

In fact, the two liveries are quite the same (albums 30 and 31). Only small details change (e.g. The picture of the book).
