Synopsis

Welcome to Villeumol!

On this map beyond time, location (and logic) you will certainly find something to distract and amuse you.

It is possible on a single line to go from an urban landscape to an airport scenery via the countryside and heavy industrial zones.

You will not be able to get bored down here if you dare to climb Mont Villeumol to the depths of Harvignies. But be careful, remember to take a powerful engine.

A family outing is always pleasant and delights children so opt for a day at the amusement park. But if the journey and paid parking do not enchant you, do not bother with your car. Come by train to Villeumol station and board the P+R shuttle which will take you in no time to the gates of your favorite park.

Like any self-respecting company, it goes without saying that you will provide circular shuttle services or school transport and other special services with adapted vehicles. The railway training is accessible to you after 2 years of active service in buses and will allow you to drive a tram on the Villeumol Light Rail network, alternating with bus services or exclusively tram.

If you are a sports supporter, take your service with a coach decorated in the colors of your favorite club and take your supporter friends to the local stadium.

Treat yourself to a snowy getaway or an afternoon at the beach with the Baie/Ski shuttles operated by our local private coach operator.

Before boarding your plane for a dream destination or for business, relax in one of our prestigious Casino Hotels by going there aboard one of the many airport shuttles at your disposal.

Have fun and relax!

Installation

First installation

To save time on installation, it is advisable to use the “maptool” software to avoid downloading objects already present in your files.

For the map to work properly, please download the following :

Update to 0.12

If you missed one or more patches for version 0.10, it is strongly recommended to download the patches via the button on the site "Patch 0.10.X".

Then you can download an update pack via the button "Update 0.12".

THE FOLLOWING IS ONLY TO BE DONE IF YOU HAVE HAD VERSIONS BEFORE 0.9 !

Before installing this version of the map, you will need to perform a few operations if you have had other versions. If this is the first time you are downloading the map, congratulations, you will not have to do anything. Otherwise, continue reading this section.

In order not to create confusion in the files, you will need to delete some files and folders listed below.

- OMSI 2\Maps\Villeumol
- OMSI 2\Sceneryobjects\HO'BUS MATON*
- OMSI 2\Sceneryobjects\HoBusMaton*
- OMSI 2\Splines\Ho Bus Maton*

* By deleting these files, maps that used them may no longer work.

Changes made

0.12

- Addition of new lines (14, 14/, 15, 16/, 22, 89, 89/, 92, 98, 98/, C5, N4)
- Addition of new P+R variants
- Addition of small decorative elements
- Decoration of lines 12
- Change of route of lines 12
- Rearrangement of certain areas
- Optimization of scripts
- Minor corrections
- Redesign of digital displays

0.12.1

- Following the shutdown of the downloads of "vtransitcenter.com", the missing objects are provided directly
- For the "David M" objects, download the map "Alheim Laurenzbach updated" (link provided above)
- Fixed a bug in the AI-List (no AI DeLijn buses were running)
- Added a missing static vehicle

0.12.2

- Added missorted red light objects to file 0.12
- Added DeLijn poles (forgotten in update pack)

Practical Advice

- Read the tables below to help you choose the right type of vehicle and the right operating company.
- While driving, follow the YELLOW arrows IN PRIORITY and then the orange arrows.
- In order to be correctly detected by the traffic lights located on the dedicated bus and tram sites, be at least 10 meters away from it and wait for the car lights to turn red so that your light gives you priority.
- In case of problems or suggestions with the map, you can go to the project Discord [Omsi2 - Map Villeumol](#).

Villeumol Light Metro

Tram driver training

The signaling

	P.I.V.	Maximum speed indicator in kph
		Entrance to the light rail network (controlled area) Driving on light rail regulations, speed controlled by beacons and dedicated signage
		Exit from the light rail network (uncontrolled area) Driving on the road network. Uncontrolled speed and public transport signs
	TRAM STOP	At the station, the driver must stop at this sign
	P.I.D.	Direction indicator sign
	P.M.V.	Sight walking sign Indicates to the driver to drive on sight at a maximum speed of 20 km/h and to be able to stop in front of any obstacle if necessary.
		Public transport traffic light detection out of service Indicates to the driver that the TRAM detection is not operational. At the foot of the traffic light, the driver must stop, check that the road is clear, drive on sight (20 kph MAX) and be able to stop in front of any obstacle if necessary.
		Door opening side indicator

Type of lines

Currently the network includes lines 7, 8, 16/, 89 and 89/.

Line 7 is a village line preserved in the state of the original operating network and which serves the village of Grobstein. Only one tram runs on this line with one departure every hour in both directions.

Line 8 was put into service on a political and purely functional basis in order to connect the airport directly with Villeumol station. It ensures a fast and high-capacity rate for commuters. It is in the form of a loop, although its terminus at the airport is indicated and its return to the station is also indicated.

Line 16 provides a connection between the HBM depot in Cootereen and the SNCB station in Bomchoat, serving Villeumol-Sud airport. This line is a mix between non-modernized local service, urban service on dedicated site along the road and light metro service. Only the limited route 16/ between Cootereen and the airport is currently passable.

Line 89 is an old local line connecting the small village of Caramel to the Pontay light metro station. On its route, the line winds through the countryside to serve the most picturesque villages. Its section between Fétanques and Pontay has been modernized and offers optimal driving comfort.

Line 89/ is a limited school route of the 89. After having made an identical route between Caramel and Fétanques, the line goes to terminate at Grobstein.

General provisions

Before the game

To limit errors as much as possible while driving the tram, please do the following: Before starting the game, it is advisable to switch to the tram version (2.2.032) to use a tram and in order to avoid disappearance bugs, it is advisable in the options, to set the number of neighboring tiles to 3.

Taking service

The appearance of a tram on OMSI can be unpredictable.

This is why a KT4D type "Tatra" train is waiting for you at the Cicéron depot. This train is on the line, under tension and ready to leave on the line, from where the "Reserve" display is displayed.

If you want to drive another type of tram, you are advised to have it appear at Grobstein, where the loop is simple and quick to do in order to quickly set off in the right direction on the network.

There are proportion errors at the station platforms. These are designed on the basis of another tram not available to the public.

In service

Given the existence of a single-track section between the Pontay and Walibi stations, in the event of a delay of more than 2 minutes on the T7, you are asked to wait at the "Pontay" station for the next passage of the T8.

Regarding the T8, when leaving at 50 minutes past Walibi, you are asked not to start before the time.

Replacement buses

In order to guarantee the safety of our passengers and to avoid running almost empty trains all night, buses take over from midnight to 5:30 a.m. for the 8 and from 8 p.m. to 9:35 p.m. and from 5 a.m. to 6:35 a.m. for the 7.

You, being both a wattman and a bus driver, are of course authorized to carry out these services.

Copyrights

All objects and maps to download in the "first installation" section go to their respective authors.

If you are the uncited owner of one or more objects, do not hesitate to contact us.

Any reuse of objects from the HoBusMaton files without prior authorization is strictly prohibited.
