

Introduction

Welcome to Cranleigh. A fictional bustling city located in South East England, near London, with a population of over 150,000. Famous for its cathedral and markets as well as one of the largest universities in Europe. The city has grown since its inception in 1405 however grew rapidly in the 60s and again in the early 2000s after several new suburbs were built including Adlington and New Reservoir Estate which was built over old reservoirs that had fallen into disuse. The main A road to get to and from Cranleigh is the A3 which is also one of the main routes that links London to the rest of the South West of the UK. Since Cranleigh is within the London Commuter belt there are frequent trains between London and Cranleigh as well as other parts of the South East, such as Reading and the South Coast

The City has several operators however the main ones are Arriva and Stagecoach which are some of the largest bus operators within the UK. They both have depots within Cranleigh. There are also smaller independent operators that link to other parts of the South East as well as Go Ahead Metrobus which runs services towards Haywards Heath, Horsham, Crawley and Gatwick Airport. There are a couple coach routes that provide fairly frequent services towards the West, Heathrow Airport and into London.

Routes

- 2 - Royal Surrey Hospital <-> Burnham Retail Park | Operated by Arriva
- 10 - Royal Surrey Hospital <-> Herefield Station | Operated by Arriva
- 17 18 - Railway Stn <-> Caversham Hill Circular | Operated by Stagecoach
- 24 - Southgate Interchange <-> Adlington | Operated by Arriva
- 31 - Cranleigh Waterloo St <-> Downfleet | Operated by Stagecoach
- PR3 - Cranleigh Grosvenor Place <-> Adlington P+R | Operated by Stagecoach

Foreword

Hey, so a lot has happened to say the least when I first started working on Cranleigh and my life has changed a lot. And whilst I have made improvements to Cranleigh I've decided not to continue this project any further for multiple different reasons however I did think to release what I feel like would be a playable release. The map is in a somewhat complete state however scaled back from my original goal. There were additional routes I wanted to include that were completed but I removed them since they need more work. The map itself might have some bugs or issues, and the framerate around the city centre won't be great if you're on a low end PC. Because of the condensed nature of the map there is a high chance you will run into problems. I'm going to address any additional issues in additional patches.

Notes

- The timetables need to be redone so only Monday-Friday is in a good decent state.
- You will need to adjust your OMSI Settings if you have a lower end pc. It is advisable to use OMSI 2.2 using the patch tool in your OMSI Directory and have the 4GB Patch installed

What's next?

There will be a couple of patches over the next few weeks which will address any issues and the final version will be released in the late summer/autumn 2017 which will add additional routes and will make some changes to the scenery that couldn't be implemented in this version. However this will be dependent on my free time since I don't have much free time at the moment.

Installation

Extract the 7zip archive to a new folder. Holding the left mouse button, drag a box around all the folder(s) within the directory you have extracted so they are highlighted, then right click and select copy from the pop-up menu.

Open a new My Computer window and navigate into your OMSI root directory. Right click and select "Paste" from the pop-up menu. Take care not to paste into one of the other folders on screen. Your OMSI root directory is most likely:

C:\Program Files (x86)\Steam\steamapps\common\OMSI 2

C:\Program Files\Steam\steamapps\common\OMSI 2

You should see one or more pop-up windows requesting permission to merge/overwrite existing files and folders. You should select "No to all", "No, do this for all current items" or similar unless you have installed the map previously. If you aren't asked, you have pasted the files to the wrong location and need to redo step 2.

Payware Requirements

[IMPORTANT] For this map to run you will need to have Hamburg Day and Night DLC.

AI-Lists

Included in the Cranleigh Addon folder are a variety of AI-Lists that can be selected. The Default ai-list in Cranleigh is AI-list 2. The ai-lists are sorted by how detailed and resource intensive each ai-list is. Please beware that the more resource intensive ai-lists may cause OMSI to crash after a while.

To Install, Copy the ai-list from the Addons/Cranleigh/Ai-List folder and place it in Cranleigh map Directory.

Option	Requirements
1	Lightweight C400R, V3D Enviro 200 and AD156 Caetano Levante
2	Freeware Only C400R WC3, V3D Enviro 200 mmc, V3D Volvo B7TL, AD156 Caetano Levante and Helvete Man Lion Coach

Known Issues

Whilst I have made every effort to try to get this map ready for release there will be scenery that isn't perfect and there are areas where the framerate isn't great. This was one of my early projects and since then I have learnt a lot.

- Bus only appears in black. Unfortunately, the only way to resolve this is to resize the texture of the repaints to 2k.
- It is recommended to reduce your max sound count to 200 to avoid OMSI running out of memory.
- Tile Loading count must be between 1 or 2. Higher Tile counts will decrease the frame due to the condensed nature of the map especially around the city centre.
- If you're struggling with performance. It is recommended to try to reduce the texture reflexions and/or turn off mirrors or to reduce your Max sound count between 200 - 250

General Guidance

Hail and Ride Sections – These are sections where passengers need to hail the bus or you need to drop passengers off. Try dropping passengers off before or after a junction or wherever it's convenient to drop off passengers.

Destination settings

The hof file that is supplied in the Vehicles folder should work for all buses. However I did not make a hof file specifically for payware authors. e.g RM-Developments, Blueprint Productions, Studio Polygon or Masterswitch so these destinations won't be displayed as intended.
