
INFORMATION

Thank you for download my modification for map Thüringer Wald. This modification include one line with driving times around 20-70 minutes. To enhance enjoyment, modification has driveable tours from/to Betriebshof, OmniNavigation will be able to show you a route and they should be also driveable in BBS in SP/MP mode.

Timetables is available in the folder "Addons".

Notice:

I would like to point out in advance that this modification is not suitable for players who prefer a realistic timetable. This map only has a few shifts, which is not suitable for Bus Betrieb Simulator players. For this reason, I decided to add new connections. The new connections have been added with a certain degree of "sensitivity" and thoughtfulness, and are created at times when other lines are not running (73x). There are approximately 20-30 new tours available for each day. I believe this is a compromise that allows the modification to remain realistic in relation to the map and does not disrupt its perfection.

For more modifications, please check my profile on omsi-webdisk:

<https://reboot.omsi-webdisk.de/user-file-list/4115-tfc/>

INSTALLATION

Simply drag folders "Addons" and "maps" in the archive to your /.../common/OMSI 2/ folder. Original content will not be changed or replaced.

Timetable is driveable after 1st January 2025!

TOURS

For a better understanding, I would recommend you to check „Circulation Numbering“ below:

<i>Example tour</i>						
1 0 1 2 1						
Operational day		Carrier		Assigned vehicle		Shift number
1	Mo-Fr	0	OVR	1	18m	Numbered from 01 to 99 each operational day
2	Sat	1	Kessler	2	12m	
3	Sun/Hol.	2	Müller
