

Mercedes Citaro Facelift (Kajot)

STIB – Livery

Creation by Cree'

Here a document with the livery in details present in the pack Citaro Facelift create by Kajot

The transmission box recommended is OM457 6HP602

Obvious note but you need the O530 Facelift DLC to do works the livery !

Overall summary of the pack:

- 8863* Available in 1 style
- 8888* Available in 3 styles (2006, chiffres bleu, 2014)
- 9006* Available in 2 Styles (2006 et 2014)
- 9010* Only available with blind spots
- 9039* Only available with blind spots
- 9042* Available only in «2025» style

Presentation in detail (photo)

First of all, what is the difference between a 2006 and 2014 livery?

Style 2006

Outside :

Front of a bus in the style of 2006 As you can see, the arrangement of the logos is not the same, for example, on the front, the logo is located on the right, the serial number of the bus. Note that there is also the presence of the STIB website on the front (may be in Dutch depending on the number)

The rear of the bus is rather "empty", there is no logo on the rear except the deportation logo in the top left and the bus number in the top right, which has not changed in the modern livery.

Side of the bus :

Door

On the "doors" side, the logos are located near the front and rear doors as well as the 3rd door.

Driver

On the "right" side, there is the wording "Region Bruxelles Capitale" written in French and Dutch, and the STIB logos, first to the right of the "Brussels-Capital" logo, then near the rear wheel and the same at the level of the remark

Intérieur

The interior of the bus did not have a "wooden" floor and had fabric seats at the time.

Style 2014

Outside :

Front face

Front of a bus in the style of 2014, as you can see, the STIB logo is on the left and the number on the right. It is notable that the STIB website is no longer present on the modern version. The STIB logo is now accompanied by a ".brussels"

Back face :

The back of the bus is almost similar, except that there is now the STIB logo at the bottom left.

Side of the bus

Door

There is only a STIB logo with ".brussels" on the second door of the bus.

Driver

There is also only one logo on the driver's window.

Inside

The interior of the bus now has a wooden floor, as well as leather seats.

The variants of the bus :

8863

Le 8863 in 2006 style.

8888

Here's a version of the 8888 with the number in blue on the front, like on the A500. Note that this was already arranged as on the Style 2006 on the Facelift.

Le 8888 in the style « 2006 »

The 8888 notably had a 2014 version of its livery

9006

The 9006 in 2006 style

The 9006 in 2014 style. Note that it has the blind spot stickers we have today on all STIB buses

9010

The 9010 in the 2014 style. Note that the number is misaligned at the front and that it has a "Angle Morts 2nd version" sticker.

9039

The 9039 in 2014 version, having "blind spots 1st version" stickers

9042

The 9042 in 2014 livery, with modern "blind spots" stickers and a "credit card" sticker.

Fun fact: The 9042 was inspired by a photo showing it with the "last trip" display.

Thank you for reading this document. I hope you enjoyed learning a little more about the liveries!

Please let me know if there's anything else I need to add to the document.

If you find any errors, please contact me on the WebDisk!

And have a good trip with these buses!
