

Ikarus 260.43 for the *Thüringer Wald* (translated with www.deepl.com)

Thank you very much for downloading this repaint pack. Simply extract the ZIP archive into the OMSI main directory. This is my first release, so suggestions and comments are always welcome.

The vehicle files are 3000 x 3000 pixels in size. If the bus appears black and the texture can only be seen up close, we recommend reducing the size to 1900 x 1900 pixels. To ensure that the licence plate is displayed correctly, a space must be entered in the licence plate field in the bus menu.

The models have been optimised for the Ikarus 260.43 built in 1988. The logo mod visible in the photos is not included in this repaint pack.

The interiors differ individually, with the two OVR vehicles using seat upholstery patterns from other OVR buses. The following Setvar list provides an overview of further differences and similarities.

The list was previously translated into German and is therefore unfortunately not entirely clear in some places.

used setvars

OVR (old)	OVR (new)	Kessler Reisen (old)	Kessler Reisen (new)	Müller Touristik	
0	0	0	0	0	[setvar] logo_type Front logo 0 'Ikarus' lettering and type plate present 1 Only 'Ikarus' lettering 2 Only type designation 3 No lettering
1	1	0	0	0	[setvar] lkarus_side_tab 'Ikarus' lettering above the right front wheel 0 Not present 1 Present
