

Manual for the NEOPLAN N4421

First of all, I have to say, that this bus has the same functions like every other with this build year.

The following pictures show the functions if the Cockpit:

The bus has like its idol a full-automatical thrid door and a half-automatical second door (auto open und manual closing).

There are two cameras that are shown by the screen next to the inside mirror. You can switch between the two cameras with the switch on the left side (first pic).

The INIT Printer can only be used in its full functions with activated Timetable.

Firts choose a timetable with the „Alt-Menu“ and then enter the Line and Route with the following scheme:

LINE / Route e.g. 076 / 01 for the Grundorf line.

You can open the Timetable with click on the red portfolio and the line plan with click on the blue portfolio.
