

Citaro FL 3-/G 4-Türer with M447h1AG (Natural gas version)

**Your Bus will only have the red LED-Display*

This Pack contains:

- German tutorials to switch the Citaro h1A by Sven Daniel into a natural gas version
- Some Repaints for this Bus:
 - o Basel, CH (BVB)
 - o Bern, CH (Bernmobil)
 - o AVG & SLZ (Ahlheim & Laurenzbach Updated)
 - o VBBH (Addon Bad Hügelsdorf 2020)

There will also be (german) video-tutorials by Nile, it may help to understand the description.

The Bus uses an own folder for repaints. You can still use the repaints of the diesel-engine version by copy them into the new folder. The only Things changed are the gas tank and a ventilation grille on the back left side of the bus.

You can paint the gas tank whith the command „repaint_CNG“ in the repaint-.cti, the Template is the same than the Rest of the Body (it uses the aera of the air conditioner).

For any help please use this thread: <https://reboot.oms-webdisk.de/community/thread/2556-niklas-repaintstube-repaints-aus-m-dreilaendereck-und-mehr/> . I do not give support via PM.

LG Niklas R. / der_Nik_
