reczny_retarder = 1 - Retarder stick on the desktop (MOKI) or on the column (VDO)

brak_cg_w_pierwszych = 0 - Hot-button function on first door

brak_cg_w_pierwszych = 1 - Not active

FAQ

Q: Will the modification be adapted to megapack version 1.8?

A: No, I'm planning to cut away from that base because of the spaghetti in the scripts which I don't want to mess with.

Q: Will there be more engine versions in the next version?

A: I will try, but I do not promise.

Q: Can this addon be modified?

A: You can.

Q: Can the items in the modification be used in other modifications?

A: Ask the authors for permission before using them.

Q: Will there be other door layouts such as 2-2-0, 2-2-2-0?

A: They will appear.

Q: Will there be Urbino 15 version?

A: There is a version planned.

Q: Why these displays and not others?

A: Megapack has problem with processing other types. I tested 10 different versions and only the basic displays and those included in the modification worked correctly.

Final Provisions

I sincerely thank all the project supporters and contributors for their help with this creation. To Miejskie Zakłady Autobusowe for making the vehicle available and for the opportunity to look into every nook and cranny of the vehicle. Grochowiak for collecting the materials and safely transporting thousands of passengers a day in these vehicles. Password for the package: Euro3Mod270320211406 Sobol and Morpheusz for sounding the vehicle. Skyliner for showing me the smallest errors. Yuno for models. MichauSto for his patience while I was bugging him for help, and all the others who contributed to the development of the addon!

Attention Painters!

Please use the paint scheme included in the package, it differs from previous versions of solaris!
