

Iveco Crossway LE – ENHANCED LIGHT MOD

Improving lights, fixing a few bugs and adding new features...

Changelog

- New daytime running lights texture
- Daytime running lights are now activated after engine start
- Daytime running lights illuminate the road
- Cornering light can be switched off with setvar
- Added lights to illuminate the entrance area outside the vehicle (setvar)
- Automatic switching on of warning lights when doors are opened can be switched off with setvar

List of setvars

The mod adds a few more setvars, the functionality of the setvars from the original cars is not changed.

OMSI – IVECO CROSSWAY LE – ENHANCED LIGHT MOD
V1.0

[sv_lights_cornering_light](#)

Activates/deactivates the cornering light.

Value of setvar	Description
0	cornering lights are deactivated
1	cornering lights are activated

[sv_lights_side_flashing](#)

Activates/deactivates the flashing of the side lights with indicators.

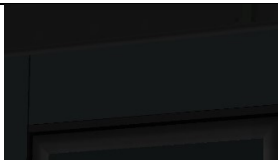

Most Crossways are equipped with this function after the facelift.

Value of setvar	Description
0	the side lights work normally
1	the side lights flash together with the blinkers (if the blinkers are not activated, they work together with the rest of the lights)

[sv_door_lights_exterior](#)

Makes visible/hides exterior lighting and door warning. For the LINE version only the entrance lighting is available, for the CITY version the door closing warning is also available.

Activating this setvar will also automatically activate the [sv_dash_extdoorslight](#) setvar, which makes the button on the dashboard for controlling the exterior door lighting visible.

Overview		LINE vesion	CITY version
			
Value of setvar	0	1	

[sv_uncoupled_warning_tuer_disable](#)

Activates/deactivates the function of automatically switching on the warning lights when the door is opened. If the function is deactivated, the buttons for deactivating this function are also hidden.

In the unmodified version of the model this function was under the [button_dooropen_visible](#) setup, but this function did not work correctly.

Overview		
Value of setvar	0	1

OMSI – IVECO CROSSWAY LE – ENHANCED LIGHT MOD
V1.0

[sv_door_warning_interior](#)

Makes visible/hides the internal door warning. This function is only available on the CITY version.
